

CHEMFARM INTERNATIONAL

Product Category - Dyes

Basic Dyes

High-strength cationic colour solutions delivering brilliant shades, excellent colour intensity and reliable performance across paper, wood, textile and specialty industrial applications.

Basic dyes are **water-soluble cationic dyes** known for their high tinctorial strength and exceptionally bright, intense colours. They have strong affinity for suitable substrates and are widely selected for applications where **vivid shades, strong colour development and efficient coloration** are important.

Chemfarm International offers basic dye solutions for a variety of industrial requirements, with a focus on **colour strength, shade consistency, solubility and dependable application performance**.

Key Applications
