

CHEMFARM INTERNATIONAL

Colour-Matching Support

Precision colour development for consistent, repeatable and customer-specific shades.

Chemfarm International manufactures and develops **custom colour solutions** for MDF, HDHMR, plywood, particle board and engineered wood products. Our formulation specialists work closely with customers to develop shades aligned with product requirements, production processes and market expectations.

With in-house formulation expertise and colour-development capabilities, Chemfarm International develops and manufactures custom dye and pigment systems designed for **shade accuracy, batch-to-batch uniformity and reliable production performance.**

Our Capabilities

- Custom Shade Development
- Colour Matching
- Shade Optimization
- Batch-to-Batch Colour Consistency
- New Product Development
- Product Reformulation
- Liquid & Pigment Colour Systems
- Application-Specific Colour Solutions

Industries We Support

MDF Manufacturing • HDHMR Boards • HDF Boards • Particle Board • Plywood • Decorative Laminates • Interior Furniture • Engineered Wood Products

Why Choose Chemfarm?

In-House Colour Development

Our technical team develops custom shades tailored to customer specifications using structured colour-formulation and evaluation techniques.

Manufacturing Excellence

Our formulations are manufactured under controlled production and quality procedures to support dependable product quality and repeatable colour performance.

Research & Product Development

Continuous formulation development enables Chemfarm International to introduce new shades, optimize existing products and respond to evolving industry requirements.

Customized Manufacturing

We develop customer-specific colour formulations based on substrate, process conditions, formulation requirements and desired shade.

Key Benefits

- Accurate Colour Matching
- Repeatable Shade Consistency

- Custom Colour Development
- Batch-to-Batch Uniformity
- Faster Product Development
- Manufacturing Expertise
- Technical Consultation
- Reliable Production Performance
- Pan-India & Global Supply

Featured Colour Development

Chemfarm Emerald™ – Premium Lush Green Basic Dye

A Chemfarm-developed lush green cationic/basic dye positioned for HDHMR and MDF board colouring. The formulation is designed for rich colour development, shade consistency and demanding engineered-wood production environments.

Chemfarm M-Violet™

A high-strength violet basic dye developed for engineered-wood applications requiring vibrant and uniform violet colouration.

Black Pigment Emulsion Paste

A high-strength black pigment dispersion developed for deep black coloration in MDF, HDHMR, particle board, plywood and other engineered wood applications.

Manufacturing Commitment

State-of-the-Art Manufacturing

Modern production capabilities, controlled processes and stringent quality procedures support consistent product performance.

Research & Development

Dedicated formulation development supports innovation in dyes, pigments and specialty colour solutions.

Trusted Manufacturing Partner

Chemfarm International serves customers across India and international markets with high-quality, application-specific colour solutions.
