

# CHEMFARM INTERNATIONAL

## Product Category - Pigments

### Inorganic Pigments

**Durable, high-performance colour solutions engineered for excellent stability, opacity and long-lasting colour performance across demanding industrial applications.**

Inorganic pigments are **mineral-based or synthetically produced insoluble colourants** valued for their durability, opacity and resistance to demanding processing and environmental conditions. They are widely used in applications where **colour stability, weather resistance, heat resistance and dependable long-term performance** are important.

Chemfarm International offers inorganic pigment solutions for diverse industrial requirements, with a focus on **consistent colour, dispersion, durability and application-specific performance**.

#### Key Applications

Paints & Coatings • Construction Materials • Plastics • Rubber • Ceramics • Cement & Concrete • Pavers & Tiles • Masterbatches • Industrial Coatings • Specialty Applications

#### Key Benefits

- Excellent Colour Stability
- Good Opacity & Hiding Power
- Good Heat Resistance
- Good Weather Resistance
- Durable Colour Performance
- Consistent Shade Quality
- Suitable for Demanding Industrial Applications
- Broad Application Versatility

#### Key Inorganic Pigment Solutions

Iron Oxide Red • Iron Oxide Yellow • Iron Oxide Black • Chromium Oxide Green • Ultramarine Blue • Titanium Dioxide • Other Application-Specific Inorganic Pigments

#### Our Supply Commitment

##### Consistent Quality

Focused on dependable colour strength, shade consistency and repeatable performance.

##### Application Expertise

Supporting pigment requirements across coatings, construction materials, plastics, rubber, ceramics and other industrial applications.

##### Reliable Supply

Supporting manufacturers through a growing Pan-India supply and distribution network.

##### Global Reach

Developing long-term relationships and supplying customers across international markets.
