

CHEMFARM INTERNATIONAL

Product Category - Pigments

Organic Pigments

High-performance colour solutions delivering vibrant shades, strong colour strength and reliable performance across coatings, plastics, printing inks, textiles and diverse industrial applications.

Organic pigments are **carbon-based, insoluble colourants** valued for their bright shades, high tinting strength and broad colour spectrum. Unlike dyes, pigments generally remain dispersed within the application medium rather than dissolving in it, making them suitable for a wide variety of industrial formulations.

Chemfarm International offers organic pigment solutions focused on **colour consistency, dispersion, tinting strength and application-specific performance**, supporting manufacturers across multiple industries.

Key Applications

Printing Inks • Paints & Coatings • Plastics • Textiles • Rubber • Packaging • Paper • Masterbatches • Specialty Industrial Applications

Key Benefits

- Bright & Vibrant Shades
- High Tinting Strength
- Good Colour Consistency
- Broad Shade Range
- Good Dispersion Properties
- Application-Specific Performance
- Suitable for Diverse Formulations
- Reliable Batch-to-Batch Quality

Key Organic Pigment Solutions

Pigment Red • Pigment Yellow • Pigment Orange • Pigment Blue • Pigment Green • Pigment Violet • Application-Specific Pigments

Our Supply Commitment

Consistent Quality

Focused on dependable colour strength, shade consistency and repeatable product performance.

Application Expertise

Supporting pigment requirements across inks, coatings, plastics, textiles, paper and other industrial applications.

Reliable Supply

Supporting manufacturers through a growing Pan-India supply and distribution network.

Global Reach

Developing long-term relationships and supplying customers across international markets.
