

CHEMFARM INTERNATIONAL

Paper Industry – Dyes & Chemicals

1. Paper Dyes

Precision colour solutions for paper, pulp and moulded fibre applications.

Paper dyes are specially formulated colourants developed to provide bright shades, uniform coloration and excellent dispersion in paper manufacturing processes. They are widely used in tissue papers, packaging papers, paper boards, moulded fibre products and specialty paper applications. Chemfarm International supplies paper dyes focused on consistent colour development, process compatibility and reliable batch-to-batch performance.

Key Applications

Paper Mills • Tissue Paper • Kraft Paper • Packaging Paper • Duplex Board • Paper Cups • Egg Trays • Apple Trays • Molded Fibre Products • Decorative Paper • Specialty Paper

Key Products & Types

Basic Dyes • Direct Dyes • Cationic Dyes • Liquid Paper Dyes • Water-Soluble Paper Dyes • Application-Specific Colour Solutions

Key Benefits

- Brilliant Colour Shades
- Excellent Dispersion
- Uniform Colour Distribution
- High Colour Strength
- Consistent Batch Performance
- Easy Application
- Process Compatibility
- Wide Shade Availability

Our Supply Commitment

Consistent Quality • Technical Support • Reliable Supply • Global Reach

2. Paper Chemicals

Performance chemicals developed to improve papermaking efficiency, productivity and finished paper quality.

Paper chemicals improve retention, drainage, sizing, strength, brightness, foam control and overall machine performance. Chemfarm International supplies application-focused paper chemicals designed to support efficient production, consistent paper quality and reliable mill performance.

Key Applications

Writing & Printing Paper • Packaging Paper • Tissue Paper • Kraft Paper • Duplex Board • Molded Fibre Products • Paper Recycling • Specialty Paper Manufacturing

Key Products & Types

AKD Emulsion • Retention Aids • Defoamers • Optical Brighteners • Sizing Chemicals • Drainage Aids • Strength Additives • Process Chemicals • Specialty Paper Chemicals

Key Benefits

- Improved Retention
- Better Drainage
- Enhanced Paper Strength
- Improved Brightness
- Better Sizing Performance
- Reduced Foam Formation
- Improved Machine Efficiency
- Consistent Finished Paper Quality

Our Supply Commitment

Consistent Quality • Application Expertise • Reliable Supply • Global Reach
