

CHEMFARM INTERNATIONAL

Product Category - Specialty Chemicals

Process & Performance Modifiers

Tailored chemical additives designed to optimize processing behaviour, improve formulation stability and enhance finished-product performance.

Process and performance modifiers are specialized additives used to **control or enhance properties such as viscosity, rheology, flow, levelling, wetting, dispersion, stability and overall processing behaviour** in industrial formulations.

Chemfarm International offers application-specific modifier solutions designed to support **process efficiency, formulation consistency and dependable end-product performance** across diverse manufacturing sectors.

Key Applications

Paints & Coatings • Polymers & Plastics • Construction Chemicals • Home & Industrial Care • Printing & Inks • Lubricants & Greases • Specialty Chemical Formulations • General Industrial Processing

Key Products & Types

Rheology Modifiers • Viscosity Modifiers • Flow & Levelling Additives • Wetting Agents • Dispersing Agents • Anti-Sag Additives • pH Modifiers • Surface Modifiers • Application-Specific Performance Additives

Key Benefits

- Improved Processability
- Better Flow & Levelling
- Controlled Viscosity & Rheology
- Enhanced Formulation Stability
- Improved Wetting & Dispersion
- Consistent Product Performance
- Improved Processing Efficiency
- Application-Specific Modification
- Suitable for Diverse Industrial Formulations

Our Supply Commitment

Consistent Quality

Focused on reliable product quality and repeatable application performance.

Application Expertise

Supporting customers with modifier solutions suited to specific formulations, processes and performance requirements.

Reliable Supply

Supporting manufacturers through a growing Pan-India supply and distribution network.

Global Reach

Developing long-term relationships and supplying customers across international markets.
