

CHEMFARM INTERNATIONAL

Product Category - Specialty Chemicals

Silicone & Finishing Chemicals

Advanced finishing solutions developed to enhance softness, surface characteristics, fabric handle and overall finished-product performance.

Silicone and finishing chemicals are specialty formulations used to modify and enhance the **feel, appearance and functional characteristics of textiles and other suitable substrates**. These solutions can help manufacturers achieve improved softness, smoothness and application-specific finishing effects.

Chemfarm International offers silicone and finishing solutions designed to meet different processing and end-product requirements, focusing on **softness, smoothness, application consistency and finishing performance**.

Key Applications

Textile Finishing • Knitted Fabrics • Woven Fabrics • Apparel & Garments • Home Textiles • Technical Textiles • Nonwovens • Specialty Finishing

Key Products & Types

Silicone Softeners • Non-Silicone Softeners • Amino Silicone Emulsions • Hydrophilic Silicones • Specialty Silicone Emulsions • Finishing Auxiliaries • Application-Specific Finishing Chemicals

Key Benefits

- Enhanced Softness & Smoothness
- Improved Fabric Handle
- Consistent Finishing Performance
- Application-Specific Surface Effects
- Suitable for Different Fabric Types
- Improved End-Product Characteristics
- Multiple Finishing Possibilities

Our Supply Commitment

Consistent Quality

Focused on reliable product quality and consistent finishing performance.

Application Expertise

Supporting customers with finishing solutions suited to different fabrics, processing conditions and desired end-product characteristics.

Reliable Supply

Supporting manufacturers through a growing Pan-India supply and distribution network.

Global Reach

Developing long-term relationships and supplying customers across international markets.
