

CHEMFARM INTERNATIONAL

Textile Specialty Chemicals

Textile Detergents

Effective cleaning. Superior fabric preparation. Consistent process performance.

Effective cleaning and washing auxiliaries developed for efficient removal of oils, impurities and processing residues during textile manufacturing.

Textile detergents are specialized cleaning auxiliaries used during pretreatment, scouring, washing and after-treatment operations. They help remove oils, waxes, dirt and other impurities that may interfere with subsequent dyeing, printing or finishing processes. Chemfarm International offers textile detergent solutions focused on effective cleaning, emulsification, washing efficiency and process compatibility.

Key Applications

Fabric Pretreatment • Scouring • Washing • Dyeing After-Wash • Printing After-Wash • Knitted Fabrics • Woven Fabrics • Garment Processing

Key Products & Types

Textile Detergents • Scouring Agents • Washing-Off Agents • Oil & Grease Removal Agents • Low-Foam Detergents • Multipurpose Cleaning Auxiliaries • Application-Specific Detergents

Key Benefits

- Effective Removal of Oils & Impurities
- Improved Fabric Cleanliness
- Good Emulsification
- Efficient Washing Performance
- Improved Preparation for Dyeing
- Low-Foam Options
- Consistent Processing Results

Our Supply Commitment

Consistent Quality

Reliable quality and consistent performance across production requirements.

Application Expertise

Technical guidance for selecting cleaning and washing auxiliaries suited to different fabrics and process requirements.

Reliable Supply

Supporting manufacturers through a growing Pan-India supply and distribution network.

Global Reach

Developing long-term relationships and supplying customers across international markets.
