

CHEMFARM INTERNATIONAL

Textile Specialty Chemicals

Textile Fixing Agents

Improved colour retention. Enhanced fastness. Superior durability.

Performance-focused fixing solutions developed to improve dye retention, wash fastness and overall colour durability of dyed textiles.

Fixing agents are textile auxiliaries applied after dyeing to help improve the fixation and retention of colour on textile fibres. Depending on the dye-fibre system and formulation, suitable fixing agents can help improve resistance to colour loss during subsequent washing and use. Chemfarm International offers textile fixing solutions focused on improved colour retention, fastness performance, application consistency and compatibility with textile processing requirements.

Key Applications

Reactive Dyed Fabrics • Direct Dyed Fabrics • Cotton • Viscose • Knitted Fabrics • Woven Fabrics • Garments • Textile After-Treatment

Key Products & Types

Dye Fixing Agents • Formaldehyde-Free Fixers • Cationic Fixing Agents • Reactive Dye Fixers • Direct Dye Fixers • After-Treatment Agents • Application-Specific Fixing Solutions

Key Benefits

- Improved Wash Fastness
- Better Colour Retention
- Reduced Dye Bleeding
- Improved Wet Fastness
- Consistent After-Treatment
- Suitable for Multiple Dyeing Systems
- Enhanced Finished-Fabric Performance

Our Supply Commitment

Consistent Quality

Reliable quality and consistent performance across production requirements.

Application Expertise

Technical guidance for selecting suitable fixing solutions according to the dye-fibre system and required fastness performance.

Reliable Supply

Supporting manufacturers through a growing Pan-India supply and distribution network.

Global Reach

Developing long-term relationships and supplying customers across international markets.
