

CHEMFARM INTERNATIONAL

ETP Treatment Chemicals

Chemicals supporting clarification, coagulation, colour removal and wastewater-treatment operations.

PRODUCT RANGE

Poly Aluminium Chloride (PAC) • Alum • Ferrous Sulphate • Polyelectrolytes • Water Decoloring Agents • Flocculants • Sludge Conditioners • Defoamers

KEY BENEFITS

- Efficient clarification and solids separation
- Support for colour removal and wastewater conditioning
- Solutions for sludge handling and dewatering
- Application-oriented treatment support
- Suitable for industrial ETP operations

APPLICATION AREAS

ETP plants • Industrial wastewater • Process industries • High-colour effluents

MANUFACTURING & TECHNICAL APPROACH

Chemfarm International develops and supplies application-focused chemical solutions with emphasis on consistent quality, dependable performance and technical support. Product selection and formulation can be aligned with the customer's process conditions and treatment objectives.

CHEMFARM ADVANTAGE

- Manufacturer-focused approach
- Application-specific solutions
- Consistent quality control
- Technical support
- Pan-India and export-ready supply

Turning Chemistry into Solutions.
