

CHEMFARM INTERNATIONAL

STP Treatment & Sludge Management

Treatment solutions supporting clarification, solids separation and sludge-management stages in sewage-treatment systems.

PRODUCT RANGE

Cationic Polyelectrolytes • Anionic Polyelectrolytes • Non-Ionic Polyelectrolytes • Sludge Conditioners • Flocculants • Defoamers • Oxidizing & Reducing Agents

KEY BENEFITS

- Improved floc formation and settling
- Support for sludge conditioning and dewatering
- Flexible polymer options for different treatment requirements
- Process-support chemicals for STP operations
- Consistent treatment performance

APPLICATION AREAS

STP plants • Municipal wastewater • Commercial complexes • Institutional wastewater

MANUFACTURING & TECHNICAL APPROACH

Chemfarm International develops and supplies application-focused chemical solutions with emphasis on consistent quality, dependable performance and technical support. Product selection and formulation can be aligned with the customer's process conditions and treatment objectives.

CHEMFARM ADVANTAGE

- Manufacturer-focused approach
- Application-specific solutions
- Consistent quality control
- Technical support
- Pan-India and export-ready supply

Turning Chemistry into Solutions.
