

CHEMFARM INTERNATIONAL

Water Conditioning & Industrial Process Chemicals

Specialty chemicals for water conditioning and industrial water-treatment systems.

PRODUCT RANGE

Antiscalants • Polyacrylic Acid • Polymaleic Acid • MA/AA Copolymers • AA/AMPS Copolymers • Terpolymers • HEDP • PBTC • DTPMP • ATMP • RO Membrane Fouling & Cleaning Chemicals • Boiler Water Chemicals • Cooling Tower Chemicals

KEY BENEFITS

- Scale-control and deposit-management solutions
- Polymer and phosphonate technologies
- Support for RO, boiler and cooling-tower systems
- Industrial process-water conditioning
- Application-specific chemical selection

APPLICATION AREAS

RO systems • Cooling towers • Boiler systems • Industrial process water

MANUFACTURING & TECHNICAL APPROACH

Chemfarm International develops and supplies application-focused chemical solutions with emphasis on consistent quality, dependable performance and technical support. Product selection and formulation can be aligned with the customer's process conditions and treatment objectives.

CHEMFARM ADVANTAGE

- Manufacturer-focused approach
- Application-specific solutions
- Consistent quality control
- Technical support
- Pan-India and export-ready supply

Turning Chemistry into Solutions.
