

CHEMFARM INTERNATIONAL

Disinfection, Biocides & Specialty Water Chemicals

Solutions for microbial control, disinfection and specialized water-treatment requirements.

PRODUCT RANGE

BKC • Glutaraldehyde • CMIT/MIT • BIT • DBNPA • TCCA • BCDMH • DDAC • Sodium Dichloroisocyanurate • THPS • Activated Carbon • Specialty Oxidizing & Reducing Agents

KEY BENEFITS

- Microbial-control and disinfection solutions
- Activated carbon in pellet, granular and powdered forms
- Specialty treatment options for industrial water systems
- Support for hygiene and process-water management
- Broad portfolio for specialized treatment needs

APPLICATION AREAS

Industrial water systems • Cooling-water applications • Disinfection • Colour and contaminant removal

MANUFACTURING & TECHNICAL APPROACH

Chemfarm International develops and supplies application-focused chemical solutions with emphasis on consistent quality, dependable performance and technical support. Product selection and formulation can be aligned with the customer's process conditions and treatment objectives.

CHEMFARM ADVANTAGE

- Manufacturer-focused approach
- Application-specific solutions
- Consistent quality control
- Technical support
- Pan-India and export-ready supply

Turning Chemistry into Solutions.
