

CHEMFARM INTERNATIONAL

Surface Treatment Chemicals

Surface enhancement solutions developed to improve finish quality, appearance and durability of engineered wood products.

Surface treatment chemicals help improve coating performance, surface preparation and finishing quality for MDF, HDF, HDHMR panels, plywood and other engineered wood products. Chemfarm International supplies application-focused surface treatment solutions designed to enhance production efficiency, surface consistency and long-term product performance.

Key Applications

- MDF Panels
- HDHMR Boards
- HDF Boards
- Decorative Panels
- Laminated Boards
- Plywood
- Furniture Components
- Interior Panels
- Engineered Wood Products

Key Products & Types

- Surface Conditioning Chemicals
- Surface Cleaning Chemicals
- Coating Preparation Chemicals
- Finishing Additives
- Surface Performance Enhancers
- Primer Support Additives
- Specialty Surface Treatment Chemicals

Key Benefits

- Better Surface Finish
- Improved Coating Performance
- Enhanced Surface Smoothness
- Better Adhesion Support
- Improved Appearance
- Uniform Surface Quality
- Reliable Processing
- Consistent Manufacturing Performance

Our Supply Commitment

Consistent Quality – Reliable products manufactured to consistent quality standards.

Application Expertise – Technical support for selecting suitable surface treatment solutions.

Reliable Supply – Strong Pan-India supply and dependable logistics.

Global Reach – Serving engineered wood manufacturers across domestic and international markets.
